

## **Quotes from Charles Darwin Origin of Species or Origins of Stupidity?**

“The Old Testament is a false history of the world” – Charles Darwin.

That statement is a definite lie. The Prophet Isaiah has been proven numerous times to be historically accurate by both physical and prophetic evidence. – Isaiah666.com

“To think the human eye came about by natural selection is I freely confess absurd in the highest degree.”– Darwin’s Origin of Species.

That statement is a direct contradiction to his personal theory and just one of many that show his conclusions cannot be trusted.

“As far as my imperfect results go”, “as far as our ignorance permits us to judge”

“I do not know whether this statement is accurate”

“The many special facts which I have collected, but which I am unable here to give due to causes of which we are quite ignorant”

“I am aware of several causes of error”, “under our present state of ignorance”

“We are ignorant with respect to the conditions which determine the numbers and range of each species”

“If no transitional forms are found in the fossil record than my theory is false”

Transitional forms have never been discovered because they do not exist. A Transitional form would show stages of development in the fossil record. According to scientists dinosaurs lived millions of years ago yet their remains are found as completely developed skeletons. Different species are not evidence of transitional forms. A cheetah, lion and leopard are all different types of the cat species. The fossil record does not show fish or other land animals evolving or slowly transforming into modern day cats.

### **Amber Fossils Destroy the Evolution Theory**

If you have ever seen the movie Jurassic Park then you know certain animals from the past have been preserved in Baltic Amber (tree sap). Scientists claim these are also millions of years old. If that was a true statement then why do the insects look exactly the same as they do now? The honey bees trapped in amber are a great example of why evolution cannot be true. The honey bees are needed to pollinate various plants and fruits which produce nearly one third of all human food consumption.

“So imperfect is our view into long-past geological ages that we see only that the forms of life are now different from what they formerly were.” Darwin – Origin of Species

The amber fossils prove life forms are definitely not different. The truth is numerous news agencies are reporting that bees have been disappearing recently in large numbers. The black horse in the book of Revelation clearly symbolizes worldwide famine. Less Bees = 1/3 Less Food + Increase in Worldwide Population = Definite Famine.
